RARE METALS

## Ucore Rare Metals Inc.

210 Waterfront Drive, Suite 106

Bedford, Nova Scotia, Canada, B4A 0H3

info@ucore.com | www.ucore.com

Ucore Rare Metals Inc. is a well-funded development-phase mining company focused on establishing rare metal resources with near term production potential. With multiple projects across North America, Ucore's primary focus is the 100% owned Bokan – Dotson Ridge REE property in Alaska. The Bokan – Dotson ridge REE project is located 60 km southwest of Ketchikan, Alaska and 140 km northwest of Prince Rupert, British Columbia and has direct ocean access to the western seaboard and the Pacific Rim, a significant advantage in developing near term production facilities and limiting the capital costs associated with mine construction.

### Ticker Symbol

TSX.V:UCU | OTCQX:UURAF

### Recent Price (May 19, 2016)

\$0.355 (\$0.44-\$0.20)

Average Volume 391,000

### Cash (December 31, 2015)

\$2,733,673

### Shares (December 31, 2015)

197,576,472

296,519,719 Fully Diluted

## Top 10 Advantages

- AIDEA Authorized Financing up to \$145M
- Separation Technology – MRT Nanotechnology
- Highest grade HREE in the United States (NI 43-101 Compliant)
- Near term US HREE production
- Business Case (Strong IRR/Low CAPEX/Robust NPV)
- Critical product – anomalous skew towards Dy, Tb, Y and Nd
- Small environmental footprint
- Industry leading innovation (XRT, nitric acid leach, paste backfill)
- Logistics - immediate deep water access and accessible labour
- Strong geopolitical/local support

## Near Term Drivers

- Separation of Individual REEs from Bokan PLS at Pilot Scale
- Separation of Individual REEs from 3rd Party Bulk Scale Materials
- Pursue Near Term Production Opportunities
